PROJECTS

Portfolio Website | personal project

May '23 - Present

- [GitHub](#) | [Live](#)
- **Designed** clean and fresh looking **UI** and utilized color contrast tracker to improve **user experience**
- Created separate Routes for About and Contact pages to **enhance website navigation** and **user experience** while providing easy access to relevant information on Home page
- Implemented **EmailJS contact form** for users to submit messages with success/error result popups
- Deployed modern **mobile-first workflow** and added **media queries** for larger devices

Nomad Wheels | personal project

May '23 - Present

React SPA for a fictional RV rental and host company

- [GitHub](#) | [Live](#)
- Utilized **React Router 6.4** to transition between routes and implemented hooks to use the fetched data before transitioning routes
- Used **Data Layer API's loader / action functions** to fetch data from **Firebase**
- Created **React context** for the app to manage states used throughout the app while using custom **useLocalStorage hook** to access and read stored user data for React Router loader / action function that can't explicitly access app context
- Utilized **Sass** and **media queries** for delivering a tailored and reusable styles to different components, devices, and browsers
